TAKE ON A WEB DEVELOPMENT
INTERN

– A win-win for students and businesses

WHAT IS BACHELOR OF WEB DEVELOPMENT?

Computer science or multimedia design and communication graduates can opt to take an advanced-level (top-up) programme to obtain the bachelor's degree in web development. The programme takes 1.5 years to finish. A bachelor of web development can contribute to the design and development of web applications, big and small projects, for consultancies or software companies in the area of web development.

WHAT DOES A BACHELOR OF WEB DEVELOPMENT HAVE TO OFFER?

A bachelor of web development has the skills to design user interfaces tailored to different target groups, exploit the unique design options and aesthetic possibilities of the internet, as well as select and prepare web solutions in content management systems.

WHAT'S IN IT FOR YOUR BUSINESS?

Students from ZIBAT possess a broad range of the qualifications demanded by businesses today. ZIBAT students have the most up-to-date knowledge within their field and can therefore look at your business with a fresh pair of eyes. We know from our experience with internship collaboration that internships lead to exciting and fruitful outcomes for everyone involved.

An intern can:
- provide fresh blood, new knowledge and new perspectives on your business;
- help perform day-to-day tasks in your business;
- help perform analyses, development projects, calculations, campaigns or design projects which would otherwise not have been prioritised;

DID YOU KNOW THAT 95% OF ALL
BUSINESSES THAT TAKE ON INTERNS ARE
SATISFIED WITH THEIR INTERN FROM ZIBAT?

CLOSE TO YOU
CLOSE TO A JOB

- help solve problems business facing your business;
- be your informal meeting with a potential future employee with a degree.

ABOUT THE INTERNSHIP

The internship takes place over a minimum of ten to twelve weeks with average working hours of 37 hours per week.

The internship can be completed in one or several businesses. The aim is that the intern takes part in and gains knowledge about relevant business functions. The learning objectives are that the intern acquires an understanding of the knowledge that businesses expect and require of software developers, and that the intern gains experience with work methods and tools to solve specific work assignments.

The internship must be completed with an internship report.

EXTENDED COLLABORATION

After the internship, the student will be required to prepare his or her final dissertation. The collaboration between you and the intern may be extended to include the exam project if you and the intern can agree on a relevant problem definition which meets the terms of the exam project. The exam project is a study project and must therefore meet certain formal requirements. The extended collaboration should be seen as an extra opportunity for your business, as well as for the intern, for even more in-depth study; in-depth study which could result in creative and readily applicable solutions, reports etc. for use by your business.

THE PRACTICALITIES

There are no requirements for the size or structure of the business. However, you must be formally registered as a business; either in Denmark or abroad.

The student is responsible for finding a business and establishing an internship contract with the business. The contract is established by filling out an internship contract form. Before the contract can be approved, the student must discuss the content of work assignments with the internship supervisor and the business.

We will allocate a supervisor to the student for the duration of the internship, and this supervisor will act as the liaison between your business and ZIBAT. The internship supervisor will also serve as a sparring partner for the intern during the internship.

We expect you to allocate a contact person from your business who can answer any questions the intern may have concerning work assignments and working conditions, and who can represent your business at meetings with the internship supervisor. We also expect the work assignments that you allocate to the intern to be academically relevant, and we expect you to allocate appropriate resources to supervise the intern.

There are a few general terms and conditions for the internship:
- office hours and work assignments for the internship period are agreed between the intern and the business;
- the intern will continue to receive a monthly student grant (SU) from the state during the internship;
- the intern reports to the business if he or she is unable to come to work due to sickness;
- the business can always contact ZIBAT should problems occur during the internship period;
- the intern will be covered by the business' industrial injury insurance and liability insurance;
- the student will be enrolled in the Bachelor of Web Development programme at ZIBAT.

INSURANCE DURING THE INTERNSHIP

Pursuant to Executive Order no. 937 of 26 November 2003 on industrial injuries protection for students, students in internships are covered by the Industrial Injury Insurance Act and, therefore, like ordinary employees, they must be covered by the industrial injury insurance and liability insurance of the business.
