

Cybersecurity

Shape your future in Denmark with Cybersecurity

Zealand

Academy of Technologies and Business

The digital world is constantly evolving. Organisations rely on secure digital systems to deliver healthcare, financial services, public administration, communication and critical infrastructure. As cyber threats become more sophisticated, the demand for professionals who can protect people, organisations and society continues to grow.

The Professional Bachelor's Degree in Cybersecurity at Zealand Academy of Technologies and Business prepares you to become part of this rapidly developing field. You'll combine technology, governance and practical experience to tackle cybersecurity challenges in an increasingly connected world.

Study in Denmark and become part of an international learning environment where project-based learning, close collaboration with industry and practical experience are at the heart of your education.

Cybersecurity is about people as much as technology

Effective cybersecurity requires more than technical expertise. It also depends on communication, collaboration and an understanding of how organisations work. That's why you'll develop both technical competences and the ability to advise, manage risk and support secure decision-making.

Why study Cybersecurity at Zealand?

Cybersecurity is about much more than coding. Modern cybersecurity professionals need technical knowledge, analytical thinking and an understanding of people, organisations and legislation. They help prevent cyber attacks, manage risks and develop secure digital solutions that support businesses and society.

At Zealand, you'll learn how technical security, governance, compliance and communication work together to create resilient organisations.

Our project-based approach means you'll work with real-world cases and current technologies while developing the professional competences employers are looking for.

What will you learn?

You'll develop knowledge and practical experience in:

- Network security and secure infrastructure
- Ethical hacking and penetration testing
- Cybersecurity governance and risk management
- Security operations and incident response
- Secure software development
- AI, automation and emerging technologies
- Privacy, legislation and digital ethics
- Communication and collaboration across disciplines

Learn through professional practice

A mandatory internship is an important part of the programme.

You'll work with companies or public organisations where you'll apply your knowledge in practice, strengthen your technical and professional skills and gain valuable industry experience.

Many students continue working with their internship company or organisation on their bachelor's project, and internships can also lead to future employment.

Career opportunities

Here, you'll develop the knowledge, practical skills and professional network to build your career in Denmark and contribute to Danish companies – locally or internationally. Graduates work in roles such as:

- Cybersecurity Analyst
- Security Consultant
- Penetration Tester
- Information Security Officer
- Governance, Risk and Compliance Specialist
- Security Operations Centre (SOC) Analyst
- Cybersecurity Adviser

Shape your future with Zealand

At Zealand Academy of Technologies and Business, academic knowledge is closely connected to professional practice. Through project work, collaboration with industry and a mandatory internship, you'll develop the knowledge, practical skills and professional network needed to build your career in Denmark.
